CLEAN COOKSTOVES CHALLENGE

Moto Moto

A rocket stove built from recycled drums that halves charcoal use.

THE PROBLEM

People feel this every day, and nothing affordable solves it.

3 in 4

households affected in our pilot area

30%

of income lost to the problem

0

affordable local options today

OUR SOLUTION

A rocket stove built from recycled drums that halves charcoal use.

- Works on the phones and budgets people already have
- Built and tested with real households and partners
- Priced so it pays for itself within months

TRACTION AND NEXT STEPS

A working prototype today. A pilot in eight weeks.
